Write a program that allows the user to enter students' names followed by their test scores and outputs the following information (assume that maximum number of students is 50):

- a. The average score.**
- b. Names of all students whose test scores are below the average, with an appropriate message.**
- c. Highest test score and the name of all students having the highest score**

Expected Output

```
Enter student name: ali
Enter student score: 50
More data? -1 to stop, others to continue: 0
Enter student name: mohamed
Enter student score: 60
More data? -1 to stop, others to continue: -1
```

```
=====REPORT=====
```

Student Name	Score
ali	50.00
mohamed	60.00

```
The number of student is 2
The average score for this class is 55.00
```

```
Below The Average Students! Work Harder!
```

Student Name	Score
ali	50.00

```
Top Scorer Student! Congratulation!
```

Student Name	Score
mohamed	60.00
