C- Pool

problem 172

Café system

My Café wants you to write a program to take orders from the Internet. Your program asks forthe item, its price, and if overnight shipping is wanted. Regular shipping for items under $10 is$2.00; for items $10 or more shipping is $3.00. For overnight delivery add $5.00

```
Enter the item name or description: pepsi
Enter the price ($): 5
Overnight delivery (0 = No, 1 =Yes)?: 1
Invoice (in $):
pepsi                               5.00
shipping                            7.00
total                              12.00
```
